

Shaklee Highlights

Dr. Forrest C. Shaklee invented the very first “Vitalized Minerals” in 1915. The beginning of those two words spells “vitamins”. The Shaklee Corporation launched in 1956 and has been going strong ever since. Dr. Shaklee has always taken a stance for being in harmony with nature and being so-called green, before “green” was even a term.

Roger Barnett spent around \$25 million of his own money to put a team together to find a company that had a good past, present, and future he could confidently invest his money into... and Shaklee was the only one that met all of his requirements. He bought Shaklee in 2004 and refuses to collect a paycheck from his investment.

Shaklee was approached by NASA in 1993 to make AstroAde to keep astronauts hydrated, and is still used today.

Get Clean household cleaning products are not just good for the environment and good on your wallet, they are effective enough in their cleaning ability to get mentioned on top notch shows like Oprah, Dr. Oz, Rachel Ray, and NBC news. Even the White House in Washington D.C. uses Shaklee cleaners to get the job done well with non-toxic products.

180 weight loss program has been designed to keep 99.9% lean muscle mass, which helps target fat-loss and change a person’s shape in a whole new direction. When compared to other weight loss programs, Shaklee’s 180 meal replacements, with the help of an active lifestyle, helped users gain 25% more muscle and lose 50% more body fat comparatively.

Over \$250 million invested in clinical testing, research, and development. In fact, Shaklee’s products have more clinical studies than the next 6 nutritional companies combined... and they are backed by a no-hassle, unconditional 100% money back guarantee. Shaklee is the number one natural nutrition company in the U.S. and has never once had a recall.

Over 100,000 tests annually for product quality. Quality far beyond industry standards (Ultrapure and Pharmaceutical Grade standards). Most other companies don’t even pass the lowest quality standard of Good Manufacturing Practices (GMP).

The Food and Drug Administration (FDA) does not regulate nutritional supplements yet, but has informed Shaklee, if they do, Shaklee is setting the standard for the rest of the industry because their practices are just that good.

Over 100 scientific papers, 90 of them published in peer-reviewed journals—most nutrition companies don’t even have one.

Shaklee is the first company in the world to obtain Climate Neutral certification and totally offset their CO2 emissions, resulting in a net zero impact on the environment.
